```
1 //Code by Akshat Garg
2 public class Challenge1_3
3 {
4     public static void main(String[] args)
5     {
6         double temperature = 70.5;
7         int tvChannel = 101;
8         boolean sunny = true;
9
10        System.out.print("Welcome to the weather report on Channel ");
11        System.out.println(tvChannel);
12        System.out.print("The temperature today is ");
13        System.out.println(temperature);
14        System.out.print("Is it sunny today? ");
15        System.out.println(sunny);
16    }
17 }
18
19
```

```
Welcome to the weather report on Channel 101
The temperature today is 70.5
Is it sunny today? true
```

Result	Expected	Actual	Notes
Pass	Welcome to the weather report on Channel 101 The temperature today is 70.5 Is it sunny today? true	Welcome to the weather report on Channel 101 The temperature today is 70.5 Is it sunny today? true	Expected output from main

You got 1 out of 1 correct. 100.00%

Activity: 1.3.5.1 ActiveCode (challenge1-3)

I learned a lot about the formats and norms of Java code, and the initializations and uses of different primitive variable types. Some minor setbacks included hidden syntax and notation errors.
