Result	Expected	Actual	Notes
Passed	true	true	Checking that code contains super(
Passed	true	true	Checking that code contains OnlineCustomer extends Customer
Passed	Name: Fran Santiago Address: 123 Main St., Anytown, USA Name: Jasper Smith Address: 456 High St., Anytown, USA Email: jsmith456@gmail.com	Name: Fran Santiago Address: 123 Main St., Anytown, USA Name: Jasper Smith Address: 456 High St., Anytown, USA Email: jsmith456@gmail.com	Expected output from main
Passed	2	2	2 toString methods

You got 4 out of 4 correct. 100.00%

Activity: 9.4.1.1 ActiveCode (challenge-9-4-Customer-super)

Forgot to add a space after \nEmail:, because the comment instructions didn't have a space, and kept getting a failed testcase. Also forgot to define email, forgot to write extends Customer. Fixed them all one by one, ended up working smooth.
